

PROTECT YOUR INVESTMENT WITH AWARD WINNING LEATHER THERAPY

As you prepare for a competition, you pay close attention to your horse's health, follow a conditioning program to get him to peak fitness at just the right time, make sure you get your entry in on time and gather all the equipment you are going to need at the show grounds. In the thick of all these preparations it is easy to take your tack for granted.

It is imperative as horse owners to ensure our tack is strong and safe. We have all seen or heard about the effects faulty gear can have on not only our safety as riders and handlers but also on our horses or to others.

Even when broken tack poses no danger to others, tack failure at a crucial moment can result in heart breaking losses. Why spend so much time, energy and passion to then let ourselves down due to something as simple as not looking after our tack.

For many horse owners, tack is the biggest investment they make after they buy their horse. They want to keep that tack in top condition so it will maintain its value, stay strong and look good.

Taking the time to clean and maintain your tack will pay off handsomely in a confident and safe ride and when competing, can give you a competitive edge.

This is where the award winning Leather Therapy range of products comes in. So why use Leather Therapy?

TO INCREASE STRENGTH: Independent lab tests prove LEATHER THERAPY WASH & RESTORER/CONDITIONER increases leather strength by 36%. When the interior of leather is restored, then its useful life increases dramatically. Leather becomes more comfortable and its safety level is enhanced.

TO ELIMINATE DAMAGING MOULD & MILDEW PROBLEMS: These fungi can ultimately ruin leather. Only LEATHER THERAPY RESTORER/CONDITIONER is considered a "stand alone" product in this category by the EPA (U.S. Environmental Protection Agency) and can legitimately make the claim "Inhibits mould & mildew".

TO ENHANCE COLOUR & BEAUTY: Because LEATHER THERAPY RESTORER/CONDITIONER re-nourishes lost lubricants from the inside-out and dries "dry", faded colour pigments return to original vibrancy while it minimizes cracking and splitting.

When cleaning, maintaining or restoring your tack use the following Leather Therapy products:

LEATHER THERAPY WASH: With its convenient sprayer, you can easily deep clean even the toughest dirt & grime problems without hardening or darkening leather. Concentrated micro-suds lift out embedded dirt leaving leather clean with a wonderfully soft feel.

LEATHER THERAPY RESTORER & CONDITIONER: Closely resembles the natural moisturises that once kept hide supple. It deeply conditions from the inside-out and eradicates mould, mildew and associated odour problems. Leather lasts longer with regained suppleness and strength. Dries with a soft sheen and enhances original colour. Restores even older stiff, dried out leather.

LEATHER THERAPY WATER REPELLANT: When there is a need to guard leather from salt, water and the elements, use this long-lasting protectant. A versatile spray on application to clean, dry leather will shield smooth or suede leathers and will not change the colour, feel or breathability of the leather or fabric. It does not contain any silicone, waxes, oils or hydrocarbons.

LEATHER THERAPY FINISH: A professionally NO-WAX product used to enhance and beautify smooth leather items with a protective, flexible lustre and shine. Use when the presentation of your tack and boots are important. Apply one coat for a satin finish, more for a high shine. Should not be used on suede or nubuck.

ULTIMATELY THE RESULTS SPEAK FOR THEMSELVES!
